

Fresh Approach to Air Facility Information in Georgia

A look at reducing facility burden and streamlining the collection of facility information.

Brian Gregory

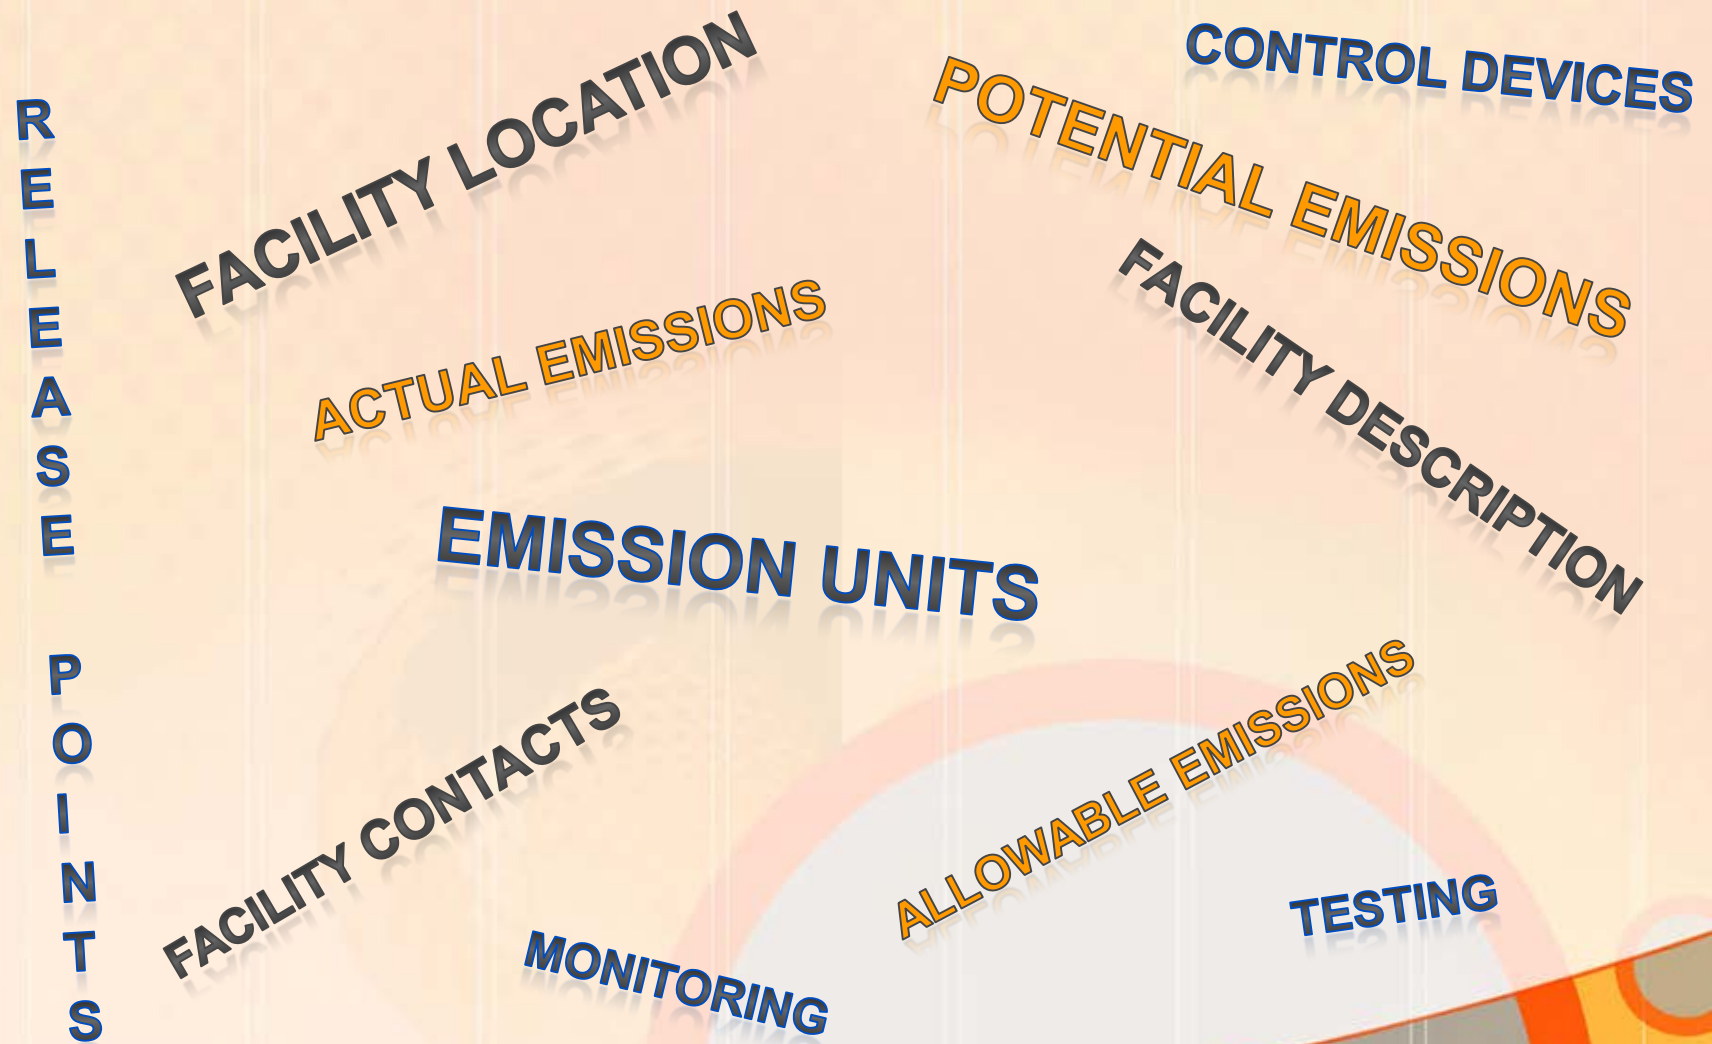

Georgia AWMA – June 6, 2012

Goal

Streamline the collection and management of facility information required by the Georgia APB

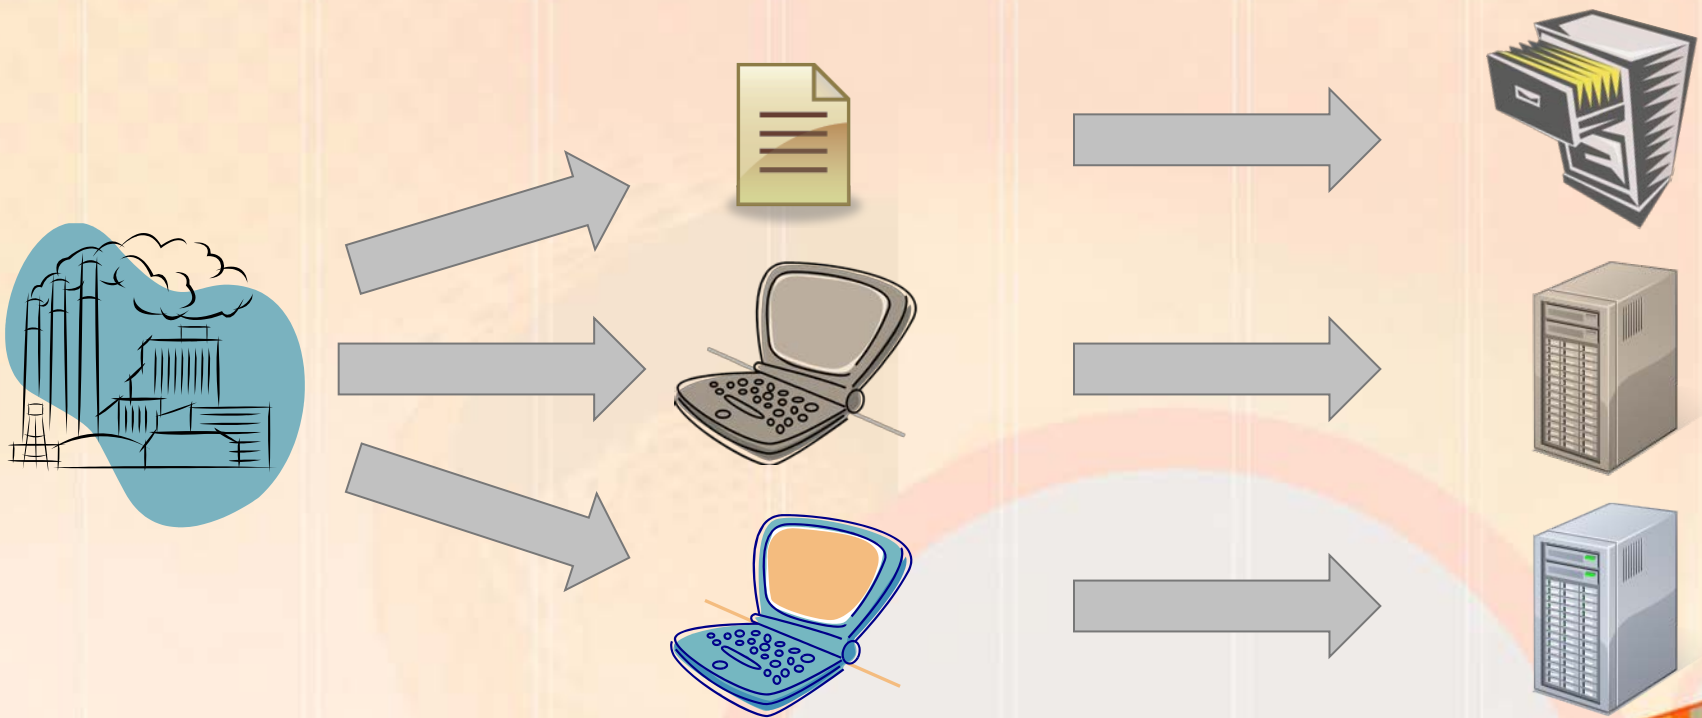

What is Facility Information?

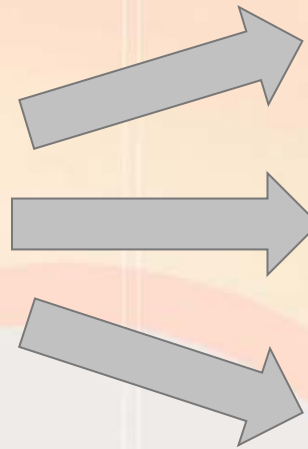

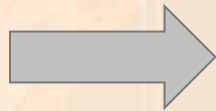

Current Approach

Multiple information gathering events that result in unreconciled information

New Approach

Create a single online facility application system for all sources in Georgia needing an Air Permit for construction and operation

Benefits

- *One modification – one application*
- *Efficient reports/querying of data for information requests*
- *Up-to-date PSD inventory for modeling*
- *All APB applications online*
- *Online search tool for Facility Applications*

Facility Challenges

- *Minor and Synthetic Minor – brand new*
- *Major Sources*
 - *Wealth of information available for migration*
 - *Emission Unit/Release Point Reconciliation*

...What's Next

- *Stakeholder involvement*
- *Application beta-Testing*
- *Application Training*
